

SAKSHI SHARMA

Cloud & Network Security Engineer | SASE, NGFW & Multi-Cloud | Escalation & Customer Support
sakshis.delhi@gmail.com | +1 (425) 625-5221 | linkedin.com/in/sakshisharmainfosec | Bellevue, WA (Seattle area)
Authorized to work in the US (L-2) — no visa sponsorship required

Seeking a Cloud Support / Escalation Engineer role supporting enterprise customers on cloud and network security platforms.

PROFESSIONAL SUMMARY

Network security engineer with ~5 years supporting enterprise customers on Palo Alto Networks platforms, progressing from first-contact technical support to L3 escalation for the vendor's Top 25 and Platinum accounts. Hands-on across PAN-OS NGFW, Panorama and Prisma Access, with VM-Series firewalls deployed on AWS, Azure, GCP and VMware ESXi. Resolves high-severity issues to root cause under 24x7 SLA, then turns the fix into runbooks and enablement that scale to front-line teams.

CORE EXPERTISE

Cloud & SASE Security	Prisma Access · GlobalProtect · Zscaler ZIA/ZPA · Prisma SD-WAN VM-Series on AWS, Azure, GCP & VMware ESXi · Hybrid cloud connectivity
NGFW Engineering	PAN-OS · Panorama · Strata Cloud Manager · Security policy & NAT design High availability · Firewall migrations & multi-vendor consolidation
Escalation & Diagnostics	Packet capture · Global counters · Session analysis · Root-cause analysis High DP/MP CPU · IPsec & SSL decryption failures · Sev-1 incident command
Customer-Facing Support	Top-tier enterprise accounts · 24x7 SLA · Runbooks, SOPs & KB authoring Mentoring & enablement · ServiceNow · Jira Service Management

WHAT THAT LOOKS LIKE IN PRACTICE

- Escalation engineer for Palo Alto Networks' Top 25 and Platinum accounts — customer firewall estates of 200+ devices.
- Carried 10–15 concurrent high-severity escalations; shift lead and on-call DRI for Sev-1 incident bridges.
- Delivered Prisma Access across 30+ sites for several thousand enterprise users at Mercedes-Benz.
- Mentored 40+ engineers across two organisations; authored the SOPs and KB articles front-line teams work from.

CERTIFICATIONS, TRAINING & AWARDS

Palo Alto Networks Certified Network Security Engineer (PCNSE) — passed 2022
CISSP — in progress, exam planned 2027
Cisco CCNA training — coursework in routing and switching: EIGRP, HSRP/VRRP, DHCP, VLANs, spanning tree
Top Performer – TAT NGFW — iOPEX Technologies, Q4 FY23
Best Productivity Award — iOPEX Technologies, Q4 FY24 and Q3 FY23

TECHNICAL SKILLS

Palo Alto Platform: PAN-OS NGFW on PA-Series and VM-Series; Panorama (device groups, templates, template stacks, pre/post rules); Strata Cloud Manager; Prisma Access (GlobalProtect, Prisma Agent, Prisma Browser); Prisma SD-WAN; Cortex XDR and XSOAR

Cloud & Virtualization: AWS; Azure (VNet, VPN Gateway, ExpressRoute, NSG, Load Balancer, Backup); GCP (VPC, firewall rules, Cloud VPN and Interconnect, load balancing); VMware ESXi and vSphere/vCenter; Docker and Kubernetes (EKS, ECS)

L7 Inspection & Security Services: App-ID, Content-ID, User-ID; Threat Prevention (IPS, antivirus, anti-spyware), WildFire, DNS Security, URL Filtering; SSL/TLS decryption (forward proxy, inbound inspection, certificates, exclusions)

Troubleshooting & Diagnostics: Stage-based packet captures, global counters, session table analysis, policy and NAT match testing, high DP/MP CPU analysis, IKE/IPsec tunnel debugging, SSL decryption failures; Wireshark and tcpdump

Networking: TCP/IP and OSI, IPv4/IPv6 subnetting, VLANs, ARP, DNS, NAT/PAT, BGP, OSPF, MPLS L3VPN, IPsec (IKEv1/IKEv2), SSL VPN, GRE, QoS

Multi-Vendor & Identity: Check Point (SmartConsole); Cisco Secure Firewall FTD via FMC; Cisco ISE (802.1X, TACACS+); FortiGate; Zscaler ZIA/ZPA; F5 LTM/GTM; Entra ID, Okta, Ping, AD/LDAP, SAML/SSO

Automation & Service Management: Python, PowerShell, Ansible, Terraform, REST and XML APIs, Git; ServiceNow, Jira Service Management

EXPERIENCE SNAPSHOT

Senior Cybersecurity Consultant · AuthenticOne Cybersecurity Pvt. Ltd.	Apr 2026 – Present
Cybersecurity Consultant · Infosys Limited — Client: Mercedes-Benz (Daimler AG)	Jun 2025 – Feb 2026
Network Security Engineer · iOPEX Technologies Pvt. Ltd.	Jan 2022 – Jun 2025

PROFESSIONAL EXPERIENCE

Senior Cybersecurity Consultant | AuthenticOne Cybersecurity Pvt. Ltd.

Apr 2026 – Present | Remote, United States

- **Partnered with the SOC team to secure client network infrastructure**, supporting continuous monitoring, threat triage and hardening reviews, and bringing NGFW and hybrid-cloud incident-response depth into day-to-day managed-security operations.
- **Strengthened client security posture with AI-assisted workflows**, applying Palo Alto and network security expertise to enhance an existing EDR platform and hardening processes, while advising on framework alignment and audit readiness.

Cybersecurity Consultant | Infosys Limited

Jun 2025 – Feb 2026 | Client: Mercedes-Benz (Daimler AG)

- **Implemented and optimised Palo Alto Prisma Access** — GlobalProtect, Prisma Agent and Prisma Browser — delivering secure internet and remote access for several thousand enterprise users across 30+ sites under a 24x7 SLA.
- **Designed and deployed multi-vendor firewall architecture** across enterprise production networks — Palo Alto, Fortinet FortiGate, Check Point and Cisco Firepower — covering security policy, NAT, IPsec/SSL VPN and high-availability pairs.
- **Administered centralised firewall management through Panorama and Strata Cloud Manager**, maintaining configuration consistency, policy deployment and visibility across distributed firewall estates of 1,000–5,000 rules.
- **Managed Check Point end to end via SmartConsole** — migrations, version upgrades and hotfixes, rule-base cleanup and HA clusters — and ran Cisco ISE for 802.1X wired access and TACACS+ device administration.
- **Led firewall migrations and site cutovers with zero unplanned downtime** during multi-vendor platform consolidation, running design reviews and proof-of-concepts and presenting trade-offs to client stakeholders.

Network Security Engineer | IOPEX Technologies Pvt. Ltd.

Jan 2022 – Jun 2025 | Supporting Palo Alto Networks

Progression: Initial Contact Team (2022) → Technical Support Engineer (2022) → Top Accounts Team (2024) → L3 Escalation Engineer (2024)

- **Progressed through four levels of the support organisation in three years**, ending as designated L3 engineer for Palo Alto Networks' Top 25 and Platinum customers — customer estates of 200+ firewalls, carrying 10–15 concurrent high-severity escalations.
- **Troubleshoot PAN-OS packet processing end to end** — session setup and fast path, forwarding, NAT and security policy lookup, App-ID and Content-ID inspection, zone protection — using stage-based packet captures, global counters and session analysis.
- **Resolved high dataplane and management-plane utilisation on production firewalls** by isolating the session, traffic, logging and process load driving CPU, then tuning policy, profiles and inspection to restore stable performance.
- **Deployed VM-Series firewalls and GlobalProtect remote access into hybrid-cloud architectures** across AWS, Azure, GCP and VMware ESXi, with IPsec/SSL VPN and GRE transport and high-availability firewall tiers; supported Prisma SD-WAN design, migration and troubleshooting.
- **Served as shift lead and on-call DRI for Sev-1 incident bridges**, guiding L1 engineers, mentoring 30+ team members and authoring the SOPs and knowledge-base articles the front-line team works from.

EDUCATION

B.Tech, Electrical Engineering (Electrical & Electronics) — Guru Gobind Singh Indraprastha University, New Delhi | 2017 – 2021
